

Teaching notes

A suggested activity is to show the seven slides and ask the students to quickly list five words or phrases for each image.

At a simple level students could be asked for the similarities between the series of images. Alternatively, they could be asked a question such as 'what is the geography in this picture?'

Similarly they could be asked how their five words or phrase change or develop as the slides progress.

The slides could be used to introduce the three key words of **cause**, **effect** and **response**.
