

Student tasks

1. Use the diagram, *What are the effects of tropical storms?* to construct five questions.

Each question needs to start with a different word.

The words are:

- What
- Where
- How
- Why
- When

An example of a question is:

How much rainfall fell on New Orleans during the passage of Hurricane Katrina in 2005?

or more specifically:

How high were the storm surges caused by Tropical Storm Haiyan in the Philippines in 2013?

2. Your task is to then to find the answers to the questions.
