

Student tasks:

You are going to produce a poster/presentation of where your food has come from around the world.

1. Find a minimum of ten food items in your home that are from other countries.
2. Calculate the distance travelled, using the following website: www.foodmiles.com/
3. Record this information on the following table:

Food item	Country of origin	Distance travelled
Additional foods:		

4. Present this information in the form of a poster or presentation. You could use the labels from the food you found, or you could use branded images found on the internet.

Extension activity:

Add to your poster/presentation the answers to the following questions:

- What could you do to reduce your food miles?
- Why might this be a good idea?
