

Describing the weather card sort activity:

| | | |
|---|--|--|
| Temperature | Measured in millimetres (mm). | Observe the amount of cover and type. |
| The weight of the air. | Cover measured in Oktas (a fraction out of 8). 8/8 = full cover. | The distance you can see determined by the light and weather conditions. |
| Cloud | Visibility | Measurements are taken in the shade and the units are Celsius (°C). |
| Measured in millibars. | Pressure | Precipitation |
| Shown by the direction it comes from. | This is a measure of how hot or cold it is. | Wind |
| Measured in metres. If it is clear you would say full. | Measured by speed (mph). | Observe the type falling to the ground. |
