

Snakes and ladders revision – urban issues and challenges

What are the problems of rapid urbanisation in LICs.	Use a case study to discuss an urban regeneration project in the UK.	Describe one or more strategies used to support multicultural communities in urban areas.	Outline how rapid urbanisation leads to the growth of an informal sector to the economy.	Explain how the impact of road traffic on the environment can be reduced.	An example of sustainable living.	Case study: How can squatter settlement redevelopment overcome some of the issues in these places.	END
How does introducing security cameras help improve CBDs.	What are the characteristics of the inner city?	Explain three problems of squatter settlements.	What is self-help?	Using an example you have studied, explain how the local community have been involved in reshaping their environment.	Use a case study to describe the main features of sustainable urban living.	Describe one strategy that tries to support multicultural communities in urban areas.	What does sustainable mean?
How does including local people in the decision-making process make it sustainable?	How does providing adequate open space make urban living more sustainable?	Describe how pollution problems could be reduced in cities in poor parts of the world.	What is city challenge?	Describe some issues caused by water pollution in a city in a poor part of the world.	How can water pollution be managed in a city?	Describe disadvantages of building new housing on greenfield sites.	Suggest one reason why some CBDs are in decline.
Name an example of informal economy.	Outline one impact on the environment of the increased use of road transport.	Explain how urban living can be made more sustainable.	How can regenerating housing in the inner city satisfy need?	What is site and service?	Suggest reasons for the different rates of urbanisation between the rich and poor world.	State one land use, other than housing, found in the rural-urban fringe.	What is a greenfield site?
Why are CBDs in decline?	Name an example of a LIC with sustainable transport.	Name one way to conserve the historic environment in a town/city.	Describe disadvantages of building new housing on brownfield sites.	One solution to manage air pollution in the CBD.	Name a scheme to improve squatter settlements.	One effect of industrialisation on a settlement.	Why has there been rapid urbanisation in LICs?
Name an example of a squatter settlement.	What is a brownfield site?	Why would ethnic groups choose to cluster in the same area?	Name a CBD that has gone through regeneration.	Where is the rural-urban fringe?	How can ethnic groups be more integrated?	What are the characteristics of a squatter settlement?	Name two solutions to the problems of squatter settlements.
START	Name the four areas of a settlement.	What is meant by urban sustainability?	What are the push and pull factors to urban areas?	Describe a way of reducing vehicle numbers in urban areas.	What does CBD stand for?	Describe the characteristics of the inner city.	One way to manage traffic in the CBD.
